DevOps Engineer

Platform team, Valencia or remote within Spain

R3c0n Labs S.L. builds training labs for security teams,
and the platform team keeps the machines behind them running.

What you'd work on

Our platform team runs Jenkins, Terraform on AWS and an Okta tenant.
You'd own our pipelines and infrastructure code, and join the on-call rota.

What we ask

- Three or more years running production infrastructure.
- Comfortable reading Groovy and HCL, and writing a little Python.
- You write things down.

How to apply

Send your CV to careers@r3c0n.com
